MY LIP JOURNEY
WITH FILMED

THE LIP TREATMENT GUIDE

A black and white close-up portrait of a woman with her hand near her lips, looking thoughtfully to the side. The image is a high-quality, artistic photograph with soft lighting and a shallow depth of field. The woman's hair is pulled back, and she is wearing a light-colored, possibly white, garment. The overall mood is contemplative and elegant.

You are
unique
and so
should
your lips!

The lips are an important part of our face. Our lips are our signature: a small change can impact the expression of a whole face.

Nowadays, bigger and more defined lips are one of the most common requests in aesthetic medicine.

Since your lips reflect your personality, Laboratoires FILLMED have designed different products and techniques so your doctor can offer you the most appropriate treatment, tailored to your needs, proportions and character.

How can I get an attractive and natural volume *without having overdone lips?*

FOR WHO?

You want to enhance your lip volume. You already have nice lips, but want to make them more attractive, in a natural way.

FOR WHO?

With ageing your lip definition has started to fade. Your lips are thinning and you want to reshape them.

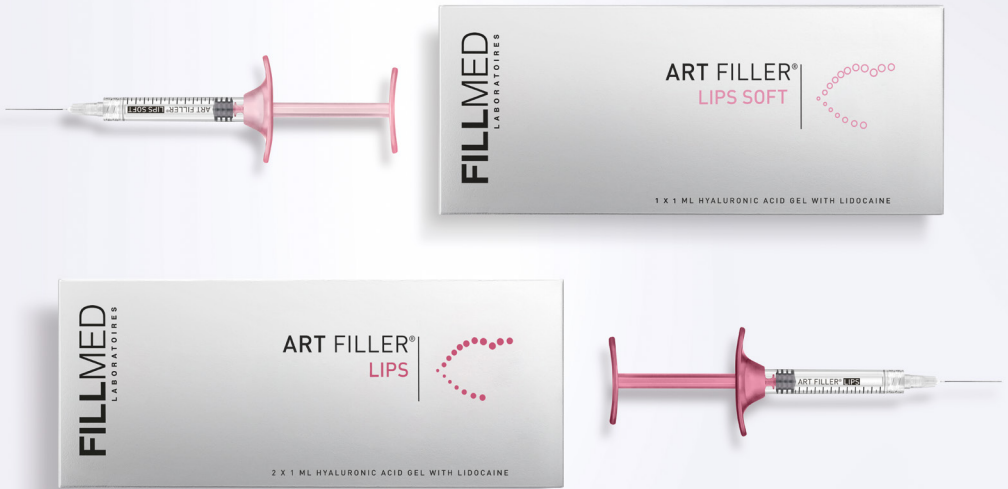

LIP FLIP

Perfect for a beautiful lip volume without the unaesthetic and unnatural overprojection, otherwise known as "the duckface". Injections are made around the top of the lip to subtly "flip" the upper lip out, amplifying its natural shape.

LIP LIFT

Perfect to smooth and sculpt your lips if you're looking for a redefined shape with a subtle volume. Injections are made around the top lip to push against the muscle above, "lifting" and giving more height and visibility to the lips.

HOW?

FILLMED offers two hyaluronic acid fillers for lip enhancement:

- ART FILLER® LIPS SOFT **for a soft and subtle volume.**
- ART FILLER® LIPS **for a plump and voluptuous lip.**

FILLMED's ART FILLER® LIPS and LIPS SOFT are dedicated lip products to enhance and reshape your lips. Your doctor will choose the right product and approach for you depending on your age⁽¹⁾, physiognomy and desired result.

BEFORE

AFTER

(1) Above 18 years old.

Did you know that lip enhancement goes beyond volumizing the lip?

The effects of gravity and time can take a toll around the mouth. Being such a mobile and expressive part of the face, fine lines, wrinkles and eventually folds start to show. This is why, correcting the wrinkles around the mouth is just as important as correcting the lips.

FOR WHO?

If you're looking to fill and smooth the wrinkles around the mouth in order to showcase your lips even further!

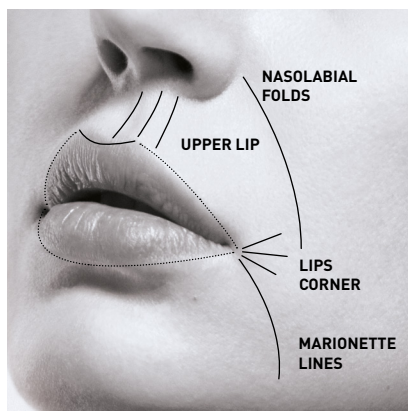

PERI-ORAL WRINKLES TREATMENT

To smooth and fill your smile lines.

HOW?

FILLMED offers 3 hyaluronic acid fillers for peri-oral treatment:

- ART FILLER® LIPS SOFT for **peri-oral wrinkles.**
- ART FILLER® LIPS for **pronounced peri-oral wrinkles.**
- ART FILLER® FINE LINES for **wrinkles in the upper lip.**

ART FILLER® range of hyaluronic acid based fillers is perfect to fill lines and wrinkles in the peri-oral area and make the skin firmer and thicker. Many areas of the face can be treated by injecting fillers, but each product is specific to the area you want to correct and the depth of the wrinkles. Your doctor will choose the right product to use accordingly.

BEFORE

AFTER

+91%

OF PATIENTS ARE STILL IMPROVED IN NASO LABIAL FOLDS, 18 MONTHS AFTER THE INJECTION^[2]

A prospective multicenter clinical trial evaluating the efficacy and safety of a hyaluronic acid-based filler with TRI-HYAL® technology in the treatment of lips and the peri-oral area. J Cosmet Dermatol. 2022 Jun 19. doi: 10.1111/jocd.15169. Epub ahead of print. PMID: 35718985.

Did you know that you can get a visible⁽³⁾ *lip gloss effect with hyaluronic acid?*

Lips can easily become dehydrated and look dry, uncomfortable and less attractive, this may even accentuate any fine lines you have around the mouth. The lip gloss effect is having well-hydrated lips that have that dewy, smooth, and healthy look, it makes the lips appear smoother, softer, and subtly colored.

FOR WHO?

This treatment is for everyone!

Alone or in combination with other lip treatments for that extra GLOW!

LIP GLOSS EFFECT

Hydrate your lips for a glossy look.

HOW?

FILLMED's hydra-booster M-HA® 10

When injected into the lips, this pure hydrating solution of hyaluronic acid helps to drench lip cells with moisture, plumping and smoothing the lips. M-HA® 10 deeply restores the hydro-balance that helps to improve skintone, elasticity and structure from within.

Frequently asked questions:

WHAT IS HYALURONIC ACID?

Hyaluronic acid is a naturally occurring acid in your skin. It gives your skin volume and keeps it hydrated. With age, your body stops making hyaluronic acid, this is why it is used to reduce wrinkles and lines but also as a lip plumping product. Hyaluronic acid gives lasting, but non-permanent results.

ARE HYALURONIC ACID BASED FILLERS PAINFUL?

To make the injections more comfortable, ART FILLER® LIPS SOFT, ART FILLER® LIPS & ART FILLER® FINE LINES contain lidocaine, an anesthetic that will make the injected area less sensitive.

WHAT ARE THE SIDE EFFECTS?

Like any aesthetic procedure, normal local reactions can occur after any injection (swelling, bruising, pain) and last for a couple of days. Contact your doctor if you have any questions.

HOW LONG DOES THE EFFECT LAST?

Hyaluronic Acid based injections usually last 12 to 18^[4] months, but it depends on your age, amount of fillers injected, treated area, your skin's condition and your lifestyle. A follow-up session may be needed to achieve the expected results, your doctor will recommend it if necessary.

CAN I HAVE THE SAME LIPS AS MY INSTAGRAM FILTER?

That's very tempting but not very realistic... Take the time to discuss what you want with your doctor. The best result is to correct your lips based on your individual anatomy of the face and the lips. Trust the expertise of your doctor. Any medical treatment can have side effects. Ask your doctor for more information.

ARE HYALURONIC ACID INJECTIONS SAFE?

Hyaluronic acid being a naturally produced and degradable molecule by our organism, hyaluronic acid based injections are considered one of the safest dermal fillers.^[5] Ask your doctor for more information.

IF I STOP THE INJECTIONS, WILL MY LIPS LOOK WORSE THAN BEFORE?

No! Your lips will return to their original volume. But many people soon get used to the results after an injection and forget what they looked like before. You might want to take photos of yourself before and after the injections to record the changes!

TIPS BEFORE THE INJECTION?

Stop drinking coffee/tea a couple of hours before and after the injection. Avoid aspirin, Vitamin C and Vitamin E before the injection. Don't apply makeup for 12 hours after the injection. Avoid touching or rubbing the treated area. Avoid exposure to extreme temperatures (sauna, hammam, cold...) as well as prolonged exposure to the sun or UV rays for 2 weeks after the injection.
